

## DILIGENCE UK

Diligence uses rigorous technical analysis to find growth areas – little known places where circumstances combine to drive a substantial increase in house prices. They advise investors where to buy, find specific properties for them, and then help with the transaction and subsequent management of the portfolio. beBRAND has advised the management team from the beginning, suggesting how to **position and name the company**; **designing the identity and marketing materials**; planning, writing, designing and creating the **web site**; and providing ongoing support as the business grows and their marketing needs expand.
